

● Syndromes of idiopathic generalized (genetic) epilepsies and related situations

I• 1	Childhood absence epilepsy (1)	22	I• 33	Eyelid myoclonia with absences (Jeavons syndrome) (1)	86
I• 2	Childhood absence epilepsy (2)	24	I• 34	Eyelid myoclonia with absences (Jeavons syndrome) (2)	88
I• 3	Childhood absence epilepsy (3)	26	I• 35	Eyelid myoclonia with absences (Jeavons syndrome) (3)	90
I• 4	Childhood absence epilepsy (4)	28	I• 36	Eyelid myoclonia with absences (Jeavons syndrome) (4)	92
I• 5	Juvenile absence epilepsy (1)	30	I• 37	Eyelid myoclonia with absences (Jeavons syndrome) (5)	94
I• 6	Juvenile absence epilepsy (2)	32	I• 38	Epilepsy with myoclonic absences (1)	96
I• 7	Juvenile absence epilepsy (3)	34	I• 39	Epilepsy with myoclonic absences (2)	98
I• 8	Juvenile absence epilepsy (4)	36	I• 40	Epilepsy with myoclonic absences (3)	100
I• 9	Juvenile absence epilepsy (5)	38	I• 41	Epilepsy with myoclonic absences (4)	102
I• 10	Juvenile absence epilepsy (6)	40	I• 42	Epilepsy with myoclonic absences (5)	104
I• 11	Juvenile absence epilepsy: temporal intermittent delta activity (1)	42	I• 43	Perioral myoclonia with absences (1)	106
I• 12	Juvenile absence epilepsy: temporal intermittent delta activity (2)	44	I• 44	Perioral myoclonia with absences (2)	108
I• 13	Juvenile myoclonic epilepsy (1)	46	I• 45	Epilepsy with phantom absences (1)	110
I• 14	Juvenile myoclonic epilepsy (2)	48	I• 46	Epilepsy with phantom absences (2)	112
I• 15	Juvenile myoclonic epilepsy (3)	50	I• 47	Typical absence status in a patient with childhood absence epilepsy	114
I• 16	Juvenile myoclonic epilepsy (4)	52	I• 48	Typical absence status in a patient with juvenile absence epilepsy	116
I• 17	Juvenile myoclonic epilepsy (5)	54	I• 49	Typical absence status in a patient with Juvenile Absence Epilepsy: inappropriate drug	118
I• 18	Juvenile myoclonic epilepsy (6)	56	I• 50	Typical absence status in a patient with juvenile myoclonic epilepsy: withdrawal of medication	120
I• 19	Juvenile myoclonic epilepsy (7)	58	I• 51	Typical absence status in a patient with phantom absences	122
I• 20	Juvenile myoclonic epilepsy (8)	60	I• 52	Absence status epilepsy (2)	124
I• 21	Juvenile myoclonic epilepsy (9)	62	I• 53	Absence status epilepsy (3)	126
I• 22	Juvenile myoclonic epilepsy (10)	64	I• 54	Perioral myoclonic status epilepticus	128
I• 23	Juvenile myoclonic epilepsy (11)	66	I• 55	Misleading aspects: asymmetric absences	130
I• 24	Juvenile myoclonic epilepsy in a patient treated with ineffective/inappropriate drugs (1)	68	I• 56	Misleading aspects: idiopathic generalized epilepsy and brain malformation	132
I• 25	Juvenile myoclonic epilepsy in a patient treated with ineffective/inappropriate drugs (2)	70	I• 57	Misleading aspects: idiopathic generalized epilepsy and parapsychological elements	134
I• 26	Juvenile myoclonic epilepsy in a patient with brain damage	72	I• 58	Particular forms of generalized epilepsy: refractory epilepsy with sleep-related fast activities (1)	136
I• 27	Epilepsy with generalized tonic-clonic seizures alone (1)	74	I• 59	Particular forms of generalized epilepsy: refractory epilepsy with sleep-related fast activities (2)	138
I• 28	Epilepsy with generalized tonic-clonic seizures alone (2)	76			
I• 29	Myoclonic epilepsy in infancy	78			
I• 30	Absence seizures in the first 3 years of life (1)	80			
I• 31	Absence seizures in the first 3 years of life (2)	82			
I• 32	Photogenic absences	84			

CHAPTER

● Neonatal seizures and epilepsies

II• 1	Neonatal seizures	144	II• 4	Early-infantile epileptic encephalopathy with suppression burst pattern (Ohtahara syndrome) (2)	150
II• 2	Early myoclonic encephalopathy	146	II• 5	Benign familial neonatal epilepsy	152
II• 3	Early infantile epileptic encephalopathy with suppression burst pattern (Ohtahara syndrome) (1)	148			

CHAPTER

● Early infantile epileptic syndromes

III• 1	Epilepsy of infancy with migrating focal seizures (1)	158	III• 9	Infantile spasms and West syndrome (5)	174
III• 2	Epilepsy of infancy with migrating focal seizures (2)	160	III• 10	Infantile spasms and West syndrome (6)	176
III• 3	Epilepsy of infancy with migrating focal seizures (3)	162	III• 11	Infantile spasms and West syndrome (7)	178
III• 4	Non-epileptic spasm	164	III• 12	Infantile spasms and West syndrome (8)	180
III• 5	Infantile spasms and West syndrome (1)	166	III• 13	Infantile spasms and West syndrome (9)	182
III• 6	Infantile spasms and West syndrome (2)	168	III• 14	Infantile spasms and West syndrome (10)	184
III• 7	Infantile spasms and West syndrome (3)	170	III• 15	Benign focal epilepsy in infancy with midline spikes and waves during sleep	186
III• 8	Infantile spasms and West syndrome (4)	172			

CHAPTER

● Epileptic encephalopathies of childhood

IV• 1	Dravet syndrome (1)	192	IV• 21	Lennox-Gastaut syndrome (12)	232
IV• 2	Dravet syndrome (2)	194	IV• 22	Lennox-Gastaut syndrome (13)	234
IV• 3	Dravet syndrome (3)	196	IV• 23	Lennox-Gastaut syndrome (14)	236
IV• 4	Dravet syndrome (4)	198	IV• 24	Lennox-Gastaut syndrome (15)	238
IV• 5	Dravet syndrome (5)	200	IV• 25	Lennox-Gastaut syndrome (16)	240
IV• 6	Dravet syndrome (6)	202	IV• 26	Lennox-Gastaut syndrome (17)	242
IV• 7	Dravet syndrome (7)	204	IV• 27	Lennox-Gastaut syndrome (18)	244
IV• 8	Dravet syndrome (8)	206	IV• 28	Epilepsy with Myoclonic-Atonic seizures (Doose syndrome) (1)	246
IV• 9	PCDH19-related epilepsy	208	IV• 29	Epilepsy with Myoclonic-Atonic seizures (Doose syndrome) (2)	248
IV• 10	Lennox-Gastaut syndrome (1)	210	IV• 30	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (1)	250
IV• 11	Lennox-Gastaut syndrome (2)	212	IV• 31	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (2)	252
IV• 12	Lennox-Gastaut syndrome (3)	214	IV• 32	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (3)	254
IV• 13	Lennox-Gastaut syndrome (4)	216	IV• 33	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (4)	256
IV• 14	Lennox-Gastaut syndrome (5)	218			
IV• 15	Lennox-Gastaut syndrome (6)	220			
IV• 16	Lennox-Gastaut syndrome (7)	222			
IV• 17	Lennox-Gastaut syndrome (8)	224			
IV• 18	Lennox-Gastaut syndrome (9)	226			
IV• 19	Lennox-Gastaut syndrome (10)	228			
IV• 20	Lennox-Gastaut syndrome (11)	230			

IV• 34	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (5)	258	IV• 37	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (8)	264
IV• 35	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (6)	260	IV• 38	Landau-Kleffner syndrome (1)	266
IV• 36	Encephalopathy with electrical status epilepticus during slow sleep (ESES) (7)	262	IV• 39	Landau-Kleffner syndrome (2)	268

CHAPTER

● Idiopathic/genetic focal epilepsies of childhood

V• 1	Panayiotopoulos syndrome	274	V• 11	Benign childhood epilepsy with centro-temporal spikes (2)	294
V• 2	Panayiotopoulos syndrome (2)	276	V• 12	Benign childhood epilepsy with centro-temporal spikes (3)	296
V• 3	Occipital childhood epilepsy of Gastaut (1)	278	V• 13	Benign childhood epilepsy with centro-temporal spikes (4)	298
V• 4	Occipital childhood epilepsy of Gastaut (2)	280	V• 14	Benign childhood epilepsy with centro-temporal spikes (5)	300
V• 5	Occipital childhood epilepsy of Gastaut (3)	282	V• 15	Benign childhood epilepsy with centro-temporal spikes (9)	302
V• 6	Occipital childhood epilepsy of Gastaut (4)	284			
V• 7	Occipital childhood epilepsy of Gastaut (5)	286			
V• 8	Occipital childhood epilepsy of Gastaut (6)	288			
V• 9	Functional “rolandic” spikes	290			
V• 10	Benign childhood epilepsy with centro-temporal spikes (1)	292			

CHAPTER

● Epilepsies and seizures in the adult and elderly

VI• 1	Transient epileptic amnesia	308	VI• 6	Alcoholic epilepsy (2)	318
VI• 2	Temporal lobe epilepsy: pseudo-Alzheimer disease (1)	310	VI• 7	Subacute encephalopathy with seizures in chronic alcoholics	320
VI• 3	Temporal lobe epilepsy: pseudo-Alzheimer disease (2)	312	VI• 8	Senile myoclonic epilepsy (Down syndrome)	322
VI• 4	<i>De novo</i> absence status of late onset	314			
VI• 5	Alcoholic epilepsy (1)	316			

CHAPTER

● Structural focal epilepsies

VII• 1	Mesial temporal lobe epilepsy (1)	328	VII• 6	Mesial temporal lobe epilepsy (6)	338
VII• 2	Mesial temporal lobe epilepsy (2)	330	VII• 7	Mesial temporal lobe epilepsy (7)	340
VII• 3	Mesial temporal lobe epilepsy (3)	332	VII• 8	Neocortical temporal lobe epilepsy (1)	342
VII• 4	Mesial temporal lobe epilepsy (4)	334	VII• 9	Neocortical temporal lobe epilepsy (2)	344
VII• 5	Mesial temporal lobe epilepsy (5)	336	VII• 10	Neocortical temporal lobe epilepsy (3)	346

VII• 11	Neocortical temporal lobe epilepsy (4)	348	VII• 19	Central lobe epilepsy (1)	364
VII• 12	Frontal lobe epilepsy (1)	350	VII• 20	Central lobe epilepsy (2)	366
VII• 13	Frontal lobe epilepsy (2)	352	VII• 21	Parieto-occipital epilepsy (1)	368
VII• 14	Frontal lobe epilepsy (3)	354	VII• 22	Parieto-occipito-temporal junction epilepsy	370
VII• 15	Frontal lobe epilepsy (4)	356	VII• 23	Occipital lobe epilepsy (1)	372
VII• 16	Frontal lobe epilepsy (5)	358	VII• 24	Occipital lobe epilepsy (2)	374
VII• 17	Premotor and central lobe epilepsy (1)	360	VII• 25	Occipital lobe epilepsy (3)	376
VII• 18	Premotor and central lobe epilepsy (2)	362			

CHAPTER

● Specific causes and special settings

VIII• 1	Febrile seizure	384	VIII• 19	Epilepsy and neuro-developmental abnormalities: lissencephaly	420
VIII• 2	Rasmussen's encephalitis (1)	386	VIII• 20	Epilepsy and neurodevelopmental abnormalities: hypothalamic hamartoma	422
VIII• 3	Rasmussen's encephalitis (2)	388	VIII• 21	Epilepsy and chromosomal abnormalities: ring chromosome 20 (1)	424
VIII• 4	Rasmussen's encephalitis (3)	390	VIII• 22	Epilepsy and chromosomal abnormalities: ring chromosome 20 (2)	426
VIII• 5	Progressive myoclonus epilepsies: Unverricht-Lundborg disease (1)	392	VIII• 23	Epilepsy and chromosomal abnormalities: Angelman syndrome (1)	428
VIII• 6	Progressive myoclonus epilepsies: Unverricht-Lundborg disease (2)	394	VIII• 24	Epilepsy and chromosomal abnormalities: Angelman syndrome (2)	430
VIII• 7	Progressive myoclonus epilepsies: MEAK	396	VIII• 25	Epilepsy and chromosomal abnormalities: Rett syndrome (1)	432
VIII• 8	Progressive myoclonus epilepsies: Lafora disease (1)	398	VIII• 26	Epilepsy and chromosomal abnormalities: Rett syndrome (2)	434
VIII• 9	Progressive myoclonus epilepsies: Lafora disease (2)	400	VIII• 27	Epilepsy and chromosomal abnormalities: Klinefelter syndrome	436
VIII• 10	Progressive myoclonus epilepsies: MERRF (1)	402	VIII• 28	Epilepsy and chromosomal abnormalities: <i>SYNGAP1</i> mutation	438
VIII• 11	Progressive myoclonus epilepsies: Gaucher disease	404	VIII• 29	Epilepsy and chromosomal abnormalities: <i>MECP2</i> gene duplication	440
VIII• 12	Progressive myoclonus epilepsies: Dentato-rubro-pallido-luysian atrophy (DRPLA)	406	VIII• 30	Epilepsy and chromosomal abnormalities: PURA syndrome	442
VIII• 13	Progressive myoclonus epilepsies: Neuronal ceroid lipofuscinosis 2 (late infantile, Jansky-Bielschowsky disease)	408	VIII• 31	Reflex seizure triggered by noise	444
VIII• 14	Progressive myoclonus epilepsies: Neuronal ceroid lipofuscinosis 3 (juvenile, Spielmeyer-Vogt disease)	410	VIII• 32	Primary reading epilepsy	446
VIII• 15	Metabolic disorders: Severe type of mucopolysaccharidosis type 2	412			
VIII• 16	Metabolic disorders: Niemann-Pick disease type C	414			
VIII• 17	Aicardi syndrome (1)	416			
VIII• 18	Aicardi syndrome (2)	418
