

Table of contents

Preface.....	5
Foreword.....	9
Chapter 1 – Cardiovascular risk factors	11
A – Hypertension	11
Definitions and diagnosis.....	13
Non-pharmacological treatment.....	16
Pharmacological treatment.....	18
HT and LVH.....	34
HT and dyslipidemia.....	36
HT of the elderly.....	38
HT and diabetes.....	41
HT and coronary heart disease.....	41
HT and stroke.....	42
HT and renal failure.....	43
HT and pregnancy.....	44
HT and ethnic group.....	45
Assessment of blood pressure control.....	45
B – Dyslipidemia	53
Factual data.....	53
Non-pharmacological treatment.....	55
Pharmacological treatment.....	56
Dyslipidemia and HT.....	66
Dyslipidemia and diabetes.....	66
Chapter 2 – Diabetes	71
Factual data.....	71
Definitions and diagnosis.....	72
Cardiovascular risk reduction.....	73
Diabetes and hypertension.....	83
Diabetes and dyslipidemia.....	91
Diabetes and coronary heart disease.....	96
Prevention of diabetes.....	98
Chapter 3 – Stable angina	101
Antianginal drugs.....	101
Prophylaxis of acute ischemic events.....	104
The prescription for patients with stable coronary heart disease.....	106
Myocardial revascularization.....	106
Chapter 4 – Acute coronary syndromes without persistent ST-segment elevation	113
Factual data.....	113
Risk stratification.....	114
Early invasive strategy vs conservative strategy.....	115
Antithrombotic therapy.....	119
Anti-ischemic therapy.....	129
Coronary angioplasty vs coronary artery bypass graft.....	130
Other drugs.....	131
Chapter 5 – Myocardial infarction with persistent ST-segment elevation	135
Factual data.....	135
Early restoration of coronary perfusion.....	135
Primary angioplasty.....	140
Adjuvant therapy.....	148
Chapter 6 – Post-myocardial infarction	159
BASIC treatment and control of risk factors.....	159
Other drugs.....	164
Implantable cardioverter-defibrillator (ICD).....	169
Chapter 7 – Valvular heart disease	173
Chapter 8 – Pericardites	175
Chapter 9 – Chronic heart failure	177
Prevention.....	177
Non-pharmacological treatment.....	178
Pharmacological treatment.....	179

Cardiac resynchronization therapy.....	198
Implantable cardioverter-defibrillator (ICD).....	199
Resynchronization and ICD.....	200
Surgical treatment.....	201
Ultrafiltration.....	205
Improved follow-up.....	205
Chapter 10 – Atrial fibrillation.....	209
Cardioversion for atrial fibrillation.....	209
Slowing of heart rate in atrial fibrillation.....	213
Control of sinus rhythm vs control of ventricular rate.....	214
Antithrombotic therapy.....	217
Chapter 11 – Venous thromboembolism.....	225
Deep vein thrombosis.....	225
Pulmonary embolism.....	232
Chapter 12 – Stroke prevention.....	239
Primary prevention of atherothrombotic stroke or TIA.....	239
Primary prevention of embolic stroke or TIA.....	241
Secondary prevention of atherothrombotic stroke or TIA.....	242
Secondary prevention of embolic stroke or TIA.....	249
Correction of symptomatic carotid artery stenosis.....	249
Correction of asymptomatic carotid artery stenosis.....	251
Tables	
Causes of refractory HT.....	47
Cockcroft and Gault formula.....	47
Levey formula (MDRD).....	48
Rationale for fixed combinations of antihypertensives.....	48
Secondary hypertension.....	49
New BHS-NICE guidelines.....	49
Evaluation of the ten-year cardiovascular risk – The Framingham equation.....	50
Evaluation of the ten-year cardiovascular risk – The SCORE grid.....	51
Conversion factors.....	66
Friedewald's formula.....	66
Body mass index.....	67
Risk of diabetes on statins.....	67
Guidelines on the management of dyslipidemic patients.....	68
Pleiotropic effects of statins.....	70
Metabolic syndrome.....	100
Silent myocardial ischemia – Cohn's classification.....	110
SYNTAX score.....	110
Angina pectoris: functional classification.....	111
EDRF, NO and nitrates.....	111
European guidelines on the treatment of stable angina pectoris.....	112
TIMI risk score in ACS without ST-segment elevation.....	133
Killip's classification of heart failure during acute myocardial infarction.....	157
Non-steroidal anti-inflammatory drugs (NSAIDs) increase the cardiovascular risk.....	157
TIMI classification of coronary perfusion.....	158
Antiarrhythmics – Vaughan-Williams' classification.....	171
Resuscitation procedures.....	172
Stages of heart failure.....	207
Measurement of left ventricular ejection fraction (LVEF).....	208
Heart failure with preserved systolic function.....	208
Bleeding risk with oral anticoagulants: Beyth's score.....	221
Classification of atrial fibrillation.....	222
CHADS2 score and CHADS2DS2-VASC.....	222
Embolic risk.....	223
HAS-BLED Score.....	223
Target recommendations (Afssaps guidelines, 2009).....	235
Main clotting anomalies predisposing to deep vein thrombosis.....	235
Severity of pulmonary embolism (Aujesky index).....	236
Miller's index.....	237
Pulmonary embolism: essential concepts.....	238
Right heart thromboembolism.....	238
Index.....	253
