Disclaimer. The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements in the book is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. The publisher and the editor(s) disclaim responsibility for any injury to persons or property resulting from any ideas, methods, instructions or products referred to in the content or advertisements.

Drug Dosage. The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

## VII Preface

Grassi, G. (Torino)

### Glycemic Control

#### 1 **Glucose Control in Diabetes: Targets and Therapy**

Bolli, G.B.; Porcellati, F.; Lucidi, P.; Fanelli, C.G. (Perugia)

#### 11 **Pregnancy and Diabetes**

Lapolla, A.; Dalfrà, M.G. (Padua)

#### 23 **Management of Hyperglycemia in Hospitalized Patients: Critical Care Setting**

Grassi, G. (Torino); Bonomo, M. (Milano)

#### 31 **Management of Hyperglycemia in Hospitalized Patients: Noncritical Care Setting**

Pichardo-Lowden, A.R. (Hershey, Pa.)

### Home Blood Glucose Monitoring

#### 47 **Self-Monitoring in Diabetes: When and How Much?**

Pintaudi, B.; Nicolucci, A. (Santa Maria Imbaro)

#### 63 **Interfering Factors in Quality of Glucose Measurement**

Hellman, R. (Kansas City, Mo.)

### Continuous Glucose Monitoring

#### 81 **Continuous Glucose Monitoring: Professional and Real Time**

Zisser, H.; Lane, J.E.; Shivers, J.P. (Santa Barbara, Calif.)

#### 99 **Real-Time Continuous Glucose Monitoring in Children and Adolescents**

Battelino, T.; Dovč, K.; Bratina, N. (Ljubljana)

#### 110 **Real-Time Continuous Glucose Monitoring in Adult Outpatients**

Bonomo, M. (Milano); Grassi, G. (Torino); Di Bartolo, P. (Ravenna); Maran, A. (Padova)

## Insulin Delivery System

- 128 Subcutaneous Insulin Pump**  
Lepore, G. (Bergamo); Tommaselli, L. (Catania)
- 143 Continuous Subcutaneous Insulin Infusion and Sensor-Augmented Pump Therapy in Children and Adolescents**  
Rabbone, I. (Turin); Frontino, G.; Bonfanti, R. (Milan)
- 151 Predictive Low Glucose Suspend: An Option for Routine Outpatient Care**  
Danne, T.; Kordonouri, O. (Hannover); Thomas, A. (Meerbusch)

## Closed-Loop Insulin-Delivery System

- 166 Artificial Pancreas: A Review of Fundamentals and Inpatient and Outpatient Studies**  
Del Favero, S.; Bruttomesso, D.; Cobelli, C. (Padova)

## Alternatives to Insulin Injection

- 190 Continuous Intraperitoneal Insulin Infusion from Implantable Pumps**  
Renard, E. (Montpellier)

## Devices to Support Treatment Decisions

- 210 Devices to Support Treatment Decisions in Type 1 Diabetes: The Diabeo System**  
Franc, S.; Charpentier, G. (Evry/Corbeil-Essonnes)
- 226 Diabetes Interactive Diary: A Mobile Phone-Based Telemedicine System for Carbohydrate Counting and Bolus Calculator**  
Vespasiani, G. (San Benedetto del Tronto); Rossi, M.C. (Santa Maria Imbaro)

## Electronic Medical Record

- 236 Standardized Information Exchange in Diabetes: Integrated Registries for Governance, Research, and Clinical Practice**  
Carinci, F.; Di Iorio, C.T. (Pescara); Massi Benedetti, M. (Perugia)
- 250 Type 1 Diabetes Care: It's Not All Technology**  
Reach, G. (Bobigny)

**259 Author Index**

**260 Subject Index**

## Preface

All technologies, including the most innovative, are always built on other existing technologies and adapted to new targets. The progress is relentless and unstoppable, like the evolution of living species. As in other fields, medical technology is presently experiencing a momentous time.

This review aims to provide an update of developments that promise to revolutionize the treatment of diabetes. It concerns hospital and outpatient care, intensive insulin therapy, blood glucose monitoring, and innovative steps towards the construction of a real artificial pancreas. ‘Better care of diabetes through technology’ could be the motto of this review.

We thank all of our colleagues who contributed to the book, but our thoughts are for the patients who, we hope, will benefit from the developments reported here.

*Giorgio Grassi, MD, Turin*
